RESVERATROL PEPTIDE ANTI-AGING TREATMENT CREAM

A dull and uneven skin tone coupled with unavoidable expression lines can exaggerate the appearance of age. To counteract these two age-contributing factors SST's SKIN has crafted a powerful and well-rounded formula in order to revive younger looking skin.

SST's SKIN Resveratrol Peptide Anti-Aging Treatment Cream uses Resveratrol, which exhibits skin lightening and anti-oxidant benefits, in conjunction with a powerful muscle-relaxing blend of peptides to soften facial features and improve the skin's complexion.

The addition of Hyaluronic acid to help moisturize the skin completes this fantastic age-defying formula. It is designed to help alleviate expression lines, provide anti-oxidant protection, hydrate and keep the skin light and radiant in a beautiful display of youthful attraction.

benefits

- Helps smooth the appearance of expression lines
- Helps to lighten skin tone and improve complexion
- Provides Anti-oxidant benefit
- Moisturizes and hydrates the skin

daily application

Morning and Evening

directions

Apply to clean skin.

ingredients

Purified Water (Aqua), Simmondsia Chinensis (Jojoba) Seed Oil, Prunus Armeniaca (Apricot) Kernel Oil, Squalane, Resveratrol, Hyaluronic Acid, Laureth-7, C13-14 Isoparaffin, Polyacrylamide, Acetyl Hexapeptide-8, Pentapeptide-18, Dipeptide Diaminobutyroyl Benzylamide Diacetate, Acetyl Glutamyl Heptapeptide-1, Palmitoyl Oligopeptide, Palmitoyl Tetrapeptide-7, Phenoxethanol, Ethylhexylglycerin.

YOUNGER LOOKING SKIN

how it works

Resveratrol is a natural phenol and phytoalexin produced by various botanicals in response to attack by pathogens and external stresses on the plant. Resveratrol is found abundantly in the skin of red grapes, and as such some of it is transferred naturally into red wine during the fermentation process.

Over the years red wine has gained a significant reputation for having a positive influence on health benefits, in particular that of the heart. Although conclusive scientific analysis of the ingredient is still underway, important skin lightening and complexion improvement effects of Resveratrol have been observed on the aesthetic appearance of the skin.

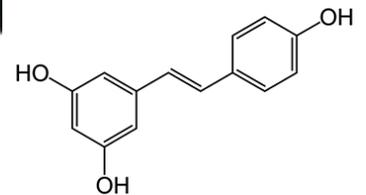

Notably skin tone and radiance is an integral piece of the anti-aging puzzle, so this formula uses Resveratrol in conjunction with a powerful blend of Peptide ingredients that positively influence the facial muscles and proved a relaxed and softer appearance with a improvement in skin tone, and lightening benefit.

The addition of 5 specific peptides, help reduce muscle contractions while stimulating Collagen synthesis to help reduce the appearance of expression lines and help strengthen the skin's elasticity and suppleness.

Muscles are contracted when they receive a neurotransmitter called Acetylcholine along a synaptic pathway. SST's SKIN Resveratrol Peptide Anti-Aging Treatment Cream has a blend of peptides that work together to disrupt this pathway, destabilizing the usual neurotransmissions and inhibiting the uptake of Acetylcholine to mnAChR receptors.

This effectively helps to reduce the frequency and extent of muscle contractions, responsible for the tension and pull on skin attached to facial muscles. In turn this provides a softer and more delicate appearance, as less stretching is exerted on the skin and expression lines are diminished.

The inclusion of hyaluronic acid rounds off this incredible anti-aging formula by providing an intense moisturizing ingredient with the remarkable ability to draw in moisture form the air and trap it within the skin. Moisturized skin provides the perfect environment for the other actives to participate and is another important factor in the convention of youthful looking skin.

Resveratrol helps to lighten skin tone and improve skin complexion

Peptides help relax the muscle contractions which result in a smoother more calm facial features for a more youthful appearance
