

RETINOL NIGHT CREAM

As we get older, our skin struggles to preserve the cell replacement cycle that contributes towards a youthful appearance. As cell division decelerates and tissue components dwindle, the visual indicators of old age creep in.

SST's SKIN Retinol Night Cream uses the stimulating qualities of Retinol to boost your skin's collagen levels and provide you with a powerful aid in the fight against aging.

Retinol is a form of Vitamin A. When applied topically to the skin it stimulates the production of collagen. This assists in increasing elasticity and texture, as well as reducing the appearance of fine lines and wrinkles.

Rich in anti-oxidants and formulated in nourishing moisturizing cream, SST's SKIN Retinol Night Cream delivers a flood of skin revitalization.

benefits

- Provides a thorough and deep cleansing
- Delivers collagen boosting Vitamin A to the skin
- Helps with the healthy regeneration of skin cells
- Delivers skin nourishing nutrients to maintain healthy skin

daily application

Evening

directions

After cleaning your skin, apply a thin layer and allow to dry.

ingredients

Purified Water (Aqua), Simmondsia Chinensis (Jojoba) Seed Oil, Prunus Armeniaca (Apricot) Kernel Oil, Squalane, Hyaluronic Acid, Retinol, Laureth-7, C13-14 Isoparaffin, Polyacrylamide, Phenoxyethanol, Ethylhexylglycerin, Alpha-Tocopherol.

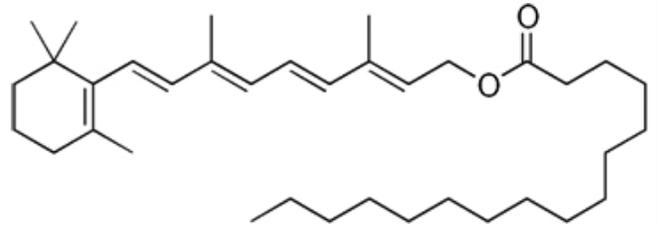

how it works

SST's SKIN Retinol Night Cream uses the synthetic form of Retinol called Retinol Palmitate, which is derived from palm oil. This beneficial active helps accelerate cell renewal and contains age combative anti-oxidants.

Retinol is a beneficial form of Vitamin A. In the skin it helps stimulate the development of collagen and regulates cell regeneration. An increase in collagen fibers and rearrangement of these fibers, provide an improvement in the elasticity and texture of the skin. This contributes towards a firmer, smoother and more radiant complexion associated with the young and healthy.

The Anti-oxidants which Retinol provides inhibit the harmful effects of oxidization and free radical damage caused by oxidization.

In this radiant formula, we've combined Retinol with Hyaluronic Acid for a smooth application and additional benefits. The Hyaluronic Acid provides excellent moisturization and a skin nourishing advantage.

Retinol is a valuable form of Vitamin A, which applied topically, helps influence collagen growth

An increase in collagen fibers helps improve elasticity and aids in the reduction of fine lines and wrinkles
